

Structural Glazed Tile...

Protects inhabitants as well as walls

When fire resistance in a wall material is of particular concern, examine the benefits of Stark Structural Glazed Facing Tile:

- Zero flame spread
- Zero fuel contribution
- Zero smoke density

Now add the permanent, minimum-maintenance ceramic glazed surface and low "U" factors for energy savings over the life of the building, and you have a superior performance wall for school and other institutional corridors, kitchens, hospitals, rest and locker rooms. Renovation, retrofit and new construction.

Consider structural glazed tile. For a technical bulletin on wall construction for one, two, three and four hour walls, call us toll free at 1-800-321-0662. In Ohio, call collect (216) 488-1211, or write **Stark Ceramics, Inc.**, P.O. Box 8880, Canton, OH 44711

A NEW CONCEPT IN LARGE VOLUME INDUSTRIAL HUMIDIFICATION

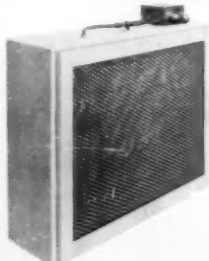

wet·pak®

MODULAR HUMIDIFIER

The new Wet-Pak modular humidifier is an efficient, high capacity humidification system. Available in multiple modules, it constantly supplies the proper relative humidity for process, materials, equipment or human comfort. Extremely flexible, with simplicity of design, it can be applied to almost any built-up air handling system.

- Accurate humidistat control
- Capacity - 1 gph per module with 1,000 cfm of inlet air at 60 F., 35% relative humidity
- Greatly broadens the industrial humidification market
- Handles practically any size building
- Can be used for evaporative cooling

AN ADDITION TO THE *Aprilaire*

COMMERCIAL HUMIDIFIER LINE

The new Wet-Pak modular humidifier fills the need for the large, industrial humidification applications. For commercial size installations, the ideal answer is the 1100 Series Aprilaire commercial humidifier line.

CONCRESEIVE[®] - the complete line of structural adhesives and protective coatings.

CONCRESEIVE products. There's nothing quite like them. They're used in the construction of offshore drilling rigs. They restore dam faces, bridge decks, and concrete highways. And in earthquake-ravaged cities, they're saving historic monuments from the wrecking ball.

As you can see, these tough, durable, versatile products fill the bill on a remarkably wide variety of construction jobs.

Concresive adhesives can bond new concrete to old. They permit you to grout bolts and rebar. And Concresive coatings protect surfaces from the effects of environmental extremes.

Their performance characteristics are unmatched. They have outstanding resistance to acids, chemicals, moisture, corrosion, impact, and abrasion.

Their adhesive strength is exceptional.

They're easy to mix and apply in the field. And they're exhaustively tested.

CONCRESEIVE products are the most complete line of structural adhesives and protective coatings available anywhere. They are manufactured by Adhesive Engineering, a company dedicated to customer service. Our field representatives are qualified experts who'll be happy to consult with you on any technical problem.

Everyday, Parrish Intermediate Chafing (drive shafts/U-joints) transmit efficient power to wastewater pumps across America & around the world.

You specify the length. From 8 3/4 inches to 50 feet or more. Misalignment to 22° mean installation ease and long life. Even under adverse conditions that would destroy other flexible couplings.

Our free catalog transmits powerful performance, application & selection information. And, includes innovations such as OSHA-Required Shaft Guard. Send today.

Increase Your Comfort and Decrease Your Heating Costs up to 50% with **CO-RAY-VAC®**

Radiant Heating System Keeps Heating Costs Low and Heat at Floor Level

Designed for industrial and commercial use, ceiling-hung Co-Ray-Vac provides draftless, dustless heat at the floor level where it's needed. Users report that Natural or LP gas consumption is reduced as much as 50%. Low maintenance and high reliability plus vacuum venting means better heat at lower cost and fewer problems. Our national network of representatives has proof that Co-Ray-Vac can be the sensible, economical choice in heating a new or existing building. They'd like to explain the Co-Ray-Vac story to you and show you installations in your area. For complete information mail the coupon or phone 716/892-8400 today.

I'd like to know more about saving fuel with the Co-Ray-Vac heating system. ☐ Please send me your new 8-page color brochure. ☐ I'd like to see an installation near me.
